

CTF-W00tabul0us-SC

This is my attempt at making a much cleaner built and sleeker looking version of the original.

I've kept the layout as close to the original map as possible while adapting parts to provide more cover and alternative routes.

Regular w00t players will find plenty familiar about the map and hopefully notice some changes for the better.

With thanks to Jackal and his 24/7 w00tabul0us server (with many and varied w00t remix maps) that gave me both the inspiration to make this and many hours of heart stoping insta-action.

Thanks also to Texas-Gtar for playing this through and having the idea about the mop.

Installation : Stick the .unr in your maps directory.

Credit to the original author and DBF clan for the most popular map this side of AndAction and to SabbathCat for 100% new brushwork and custom textures. (C)SabbathCat 2005
